DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I claims, 1 – 14 in the reply filed on February 4, 2005 is acknowledged.
2. Claim 15 was withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group II claim, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on February 4, 2005.

Claim Objections

3. Claim 2 is objected to because of the following informalities: In line 24, the phrase " thereby together with step (g)" should be deleted since the phrase makes the claim language unclear. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Lin, US 6,406,939.

Regarding claim 13, Lin teaches in an electrical device work piece having a major horizontal top surface, a method for creating a vertical planar conductive feature, said method comprising:

- (a) machining through said major horizontal top surface, to create a trench 306 (see Fig. 3B) in column 4, lines 55 – 58 and in column 6, lines 1 – 3 ;
- (b) plating at least a portion of one side of said trench 306 with conductive material 307, thereby creating a vertical planar conductive feature (see Fig. 3B) in column 6, lines 4 – 7.

Regarding claim 14, Lin teaches the step of sputtering for forming the conductive material onto at least one side of the trench in column 6, line 6, and the sputtering by partially non-directional manner is inherent in the process for the deposition on the side wall of the trench by the sputtering process.

Allowable Subject Matter

- 6. Claims 1 and 3 – 12 are allowed.
- 7. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 8. The following is an examiner's statement of reasons for allowance:

Claims 1 – 12 recite, inter alia, a method of forming a multilevel electronic device by machining into a substrate a set of first indentations, at a first level, depositing conductive material into the first indentations to create a set of first conductive features, filling the first indentations with dielectric material, machining again into said substrate a set of second indentations, at a second level and depositing conductive material into said second indentations to create a set of second conductive features. The art of record does not disclose or anticipate the above limitation in combination with other

claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Conclusion

9. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
